Course Code	BENGTWEL5	dignity as presented in the novel.
Course	English 12, Unit 6	In this unit, students will choose and read one of three
Title	Middle Eastern Literature, Part 1	Middle Eastern books. While reading, students will identify and analyze the author's choice and use of literary elements including chronology, setting, theme,
Course Code	BENGTWEL6	the point of view, etc.
Course	English 12, Unit 7	In this unit, students will choose and read one of three Middle Eastern books. While reading, students will
Title	Middle Eastern Literature, Part 2	identify and analyze the author's choice and use of literary elements including chronology, setting, theme,
Course Code	BENGTWEL7	point of view, etc. Students will also learn basic MLA Formatting.
Course	English 12, Unit 8	Frankenstein is a science fiction novel about Victor Frankenstein, a scientist who creates a terrible human
Title	Frankenstein	being out of a scientific experiment. This novel was written by Mary Shelley in answer to a competition to
Course Code	BENGTWEL8	see who could write the best horror story. Frankenstein is not the monster but rather the creator of the monster. The novel is written in the form of a series of letters are explores the theme of who deserves happiness. There is a lot of action in this tale of romance, murder, monster and punishment.

MATHEMATICS CORE

MATHEMATICS CORE		
COURS	SE: SECONDARY MATH I	TEACHER: Matney Jorgensen EMAIL: mjorgensen@alpinedistrict.org
Course	Secondary Math I, Unit 1	This unit covers solving basic equations and
Title	Solving Equations and Inequalities	inequalities. Including, multi-step equations/inequalities, variables on both sides of the equation/inequalities, literal equations/inequalities, absolute value
Course Code	BSCMTH101	equations/inequalities, and proportions.
Course	Secondary Math I, Unit 2	This unit introduces students to the idea of functions and their relationships with graphs. Students will learn to
Title	Introduction to Functions and Linear Functions	classify functions as linear and nonlinear. They will also learn how to write functions from a rule. They will
Course Code	BSCMTH102	learn how to identify domain and range and how to evaluate simple functions.
Course	Secondary Math I, Unit 3	This unit will look at basic arithmetic and geometric sequences. Students will investigate slope and how it
Title	Series and Linear Functions	relates to linear functions, including parallel and perpendicular slopes. Students will learn to identify
Course Code	BSCMTH103	slope-intercept and the point-slope forms of equations for lines.
Course	Secondary Math I, Unit 4	This unit covers different methods for solving systems
Title	Systems of Equations and Inequalities	of equations and systems of inequalities. Methods for solving will include graphing, substitutions, and
Course Code	BSCMTH104	elimination.
Course	Secondary Math I, Unit 5	This unit is an exploration of exponential functions and
Title	Exponential Functions	how they compare to other functions. Subjects include exponential growth and decay, geometric series, and
Course Code	BSCMTH105	coming various functions.
Course	Secondary Math I, Unit 6	This unit covers the basics of data analysis. Subjects
Title	Data Analysis	include frequency, histograms, measures of central tendency and dispersion, box-and-whisker plots, scatter
Course Code	BSCMTH106	plots, trend lines, and two-way frequency tables.
Course	Secondary Math I, Unit 7	This unit will take a look at transformations that include: translations, reflections, rotations, and
Title	Transformations and Constructions	compositions of isometries. There is also a lesson that covers the basics of geometric constructions.

Course Code	BSCMTH107	
Course	Secondary Math I, Unit 8	Throughout this unit, students will investigate the
Title	Congruent Triangles	properties of various types of triangles. The course starts by defining the rules that make figures congruent. They will also apply various theorems to show that two are
Course Code	BSCMTH108	similar or congruent.
COURS	E: SECONDARY MATH II	TEACHER: Emily Poai EMAIL: epoai@alpinedistrict.org
Course	Secondary Math II, Unit 1	This unit begins with an introduction to rational exponents and radicals. Students will learn how to work
Title	Rational Exponents and Polynomials	with exponential functions and functions involving radicals (ex: square roots). Topics include multiplying exponents, raising an exponent to another exponent, and
Course Code	BSECMTH21	dividing exponents. Students will also learn to add, subtract, multiply, and divide polynomials.
Course	Secondary Math II, Unit 2	This unit is a basic introduction to quadratic functions
Title	Basic Quadratics	and their basic properties. Lessons include graphing, factoring, factoring special cases, solving quadratics using different methods, and comparing quadratics to
Course Code	BSECMTH22	linear and exponential models.
Course	Secondary Math II, Unit 3	This unit will dig a little deeper into quadratic models and their behaviors. Students will learn to identify
Title	Advanced Quadratics	function families and various transformations of those functions. The idea of complex numbers and solutions
Course Code	BSCMTH203	will be introduced. Other lessons include: Cartesian circles, systems of equations, absolute value functions, and piecewise functions.
Course	Secondary Math II, Unit 4	This unit deals with different theorems and postulates
Title	Proving Theorems about Lines, Angles, and Quadrilaterals	that help students learn about different relationships between lines, the relationships between different
Course Code	BSCMTH204	angles, and also the relationships between quadrilaterals.
Course	Secondary Math II, Unit 5	
Title	Similarities	This unit discusses the similarity between polygons and triangles. It also deals with ratios, dilations, and transformations of those shapes.
Course Code	BSCMTH205	dansformations of those shapes.
Course	Secondary Math II, Unit 6	This unit discusses different aspects of triangles, including mid-segments, angle bisectors, medians,
Title	Trigonometric Functions	altitudes, and other various theorems. Right triangle trigonometry is also covered.

Course Code	BSCMTH206	
Course	Secondary Math II, Unit 7	
Title	Circles and Volume	This unit deals with the geometry of circles. It also touches on the different aspects of volume that are involved prisms and cylinders.
Course Code	BSCMTH207	involved prisms and cynnders.
Course	Secondary Math II, Unit 8	This unit discusses both experimental and theoretical probabilities. The following subjects are covered:
Title	Probability	Probability Distributions, Frequency Tables, permutations, Combinations, Compound Probability,
Course Code	BSCMTH208	Probability Models, and Conditional Probability Formulas.
COURSI	E: SECONDARY MATH III	TEACHER: Darci Rhoades Stone EMAIL: drhoades@alpinedistrict.org
Course	Secondary Math III, Unit 1	
Title	Drawing Conclusions from Data	This unit covers data analysis, standard deviations, samples, surveys, and normal distributions.
Course Code	BSCMTH301	
Course	Secondary Math III, Unit 2	This unit on polynomial functions covers adding, subtracting, multiplying, and dividing polynomial
Title	Polynomials and Polynomial Functions	function, linear factors, zeros, solving polynomial functions, dividing polynomials, the fundamental
Course Code	BSCMTH302	theorem of algebra, models in the real world, and polynomial transformations.
Course	Secondary Math III, Unit 3	This unit will cover rational expressions and their
Title	Rational Expressions and Functions	functions. It includes: simplifying, adding subtracting, multiplying, dividing, graphing, and solving rational expressions and equations. It also includes a look at
Course Code	BSCMTH303	functions and their inverses.
Course	Secondary Math III, Unit 4	This unit is a study of radical expressions and their
Title	Radical Expressions and Functions	functions. It will cover: Multiplying and Dividing Radical Expressions, Binomial Radical Expressions, Function Operations, and solving those functions.
Course Code	BSCMTH304	Graphing will also be covered as will inverse functions.
Course	Secondary Math III, Unit 5	This unit is a study of exponential and logarithmic functions. Students will explore exponential and
Title	Exponential and Logarithmic Functions	logarithmic models while learning the various properties that define them.

Course Code	BSCMTH305	
Course	Secondary Math III, Unit 6	This unit covers the basics of trigonometric functions.
Title	Trigonometric Functions	The topics of periodic data, angles and the unit circle, radian measure, the sine, cosine, and tangent functions, reciprocal trigonometric functions and basic
Course Code	BSCMTH306	trigonometric identities are covered.
Course	Secondary Math III, Unit 7	This unit covers the mathematical concepts of sequences
Title	Sequences and Series	and series, with specific sections that focus on mathematical patterns, arithmetic sequences and series, geometric sequences and series, and the binomial
Course Code	BSCMTH307	theorem.
Course	Secondary Math III, Unit 8	This unit is about applying geometric concepts. The concepts that will be covered are: Solving Density and
Title	Applying Geometric Concepts	Design Problems, Perimeters and Areas of Similar Figures, Geometric Probability, Space Figures and
Course Code	BSCMTH308	Cross Sections, Areas and Volumes of Similar Solids, and Loci.

MATHEMATICS

MATHEMATICS ELECTIVE		
COL	JRSE: ACCOUNTING I	TEACHER: Lauren Rojas EMAIL: lrojas@alpinedistrict.org
Course	Accounting I, Unit 1	In this unit, students learn the basic accounting equation.
Title	The Basic Accounting Equation	Students are taught how business transactions change the accounting equation and to analyze a transaction into
Course Code	BACCOUNT1	a debit and credit part using T-accounts.
Course	Accounting I, Unit 2	In this unit, students learn how to record business
Title	Journalizing and Posting	transactions in a journal, prove and rule a journal, and post amounts from a journal into accounts in a general
Course Code	BACCOUNT2	ledger.
Course	Accounting I, Unit 3	In this unit, students learn to manage cash and bank
Title	Cash Control and Completing	account transactions and adjusting entries. It also covers completing the worksheet in preparation for and
Course Code	BACCOUNT3	completion of the income statement.
Course	Accounting I, Unit 4	In this unit, students learn how to complete the
Title	Financial Statements and Closing the Fiscal Period	accounting cycle. It includes the income statement, balance sheet, journalizing and posting closing entries,
Course Code	BACCOUNT4	and a post-closing trial balance.
COURSE: MATH DECISION MAKING FOR LIFE		TEACHER: Matney Jorgensen EMAIL: mjorgensen@alpinedistrict.org
Course	Math Decision Making for Life, Unit 1	This unit covers various aspects of personal finance. It begins with an introduction to different wage types
Title	Finance: Income and Expenses	including commissions, salaries, hourly, and piece work wages. Students will learn how to calculate net and gross salaries, including their expected tax
Course Code	BMTHDEC01	withholding. Students will also investigate how their income and expenses are related and how to create a budget.
Course	Math Decision Making for Life, Unit 2	In this unit, students will explore various aspects of personal finance. This course specifically focuses on
Title	Finance: Investments, Loans, and Data Analysis	both long term and short-term investments, retirement income, and loans. Students will also learn how to use
Course Code	BMTHDEC02	published ratios to make informed decisions. They wi also learn how to use basic spreadsheet functions to keep track of data.

COURSE: MATHEMATICS OF PERSONAL FINANCE		TEACHER: Matney Jorgensen EMAIL: mjorgensen@alpinedistrict.org
Course	Mathematics of Personal Finance Unit 1	In this unit, students will learn about financial responsibility and making good financial decisions at a young age. Students will also learn the basics of income and expense.
Title	Income and Expense	
Course Code	BMATHPF11	
Course	Mathematics of Personal Finance Unit 2	In this unit, students learn the basics of budgeting, including making large purchases and adjusting budgets when life takes a turn. Students will also learn about bankruptcy and how it affects consumers and the economy.
Title	Budgeting	
Course Code	BMATHPF12	
Course	Mathematics of Personal Finance Unit 3	In this unit, students will learn the basics of how employees are paid and how their wages are calculated. Students will reflect on what type of job they would enjoy in the future.
Title	Employment	
Course Code	BMATHPF13	
Course	Mathematics of Personal Finance Unit 4	In this unit, students will explore various job opportunities. Students will learn how to compare benefits, cost of living, and other factors for choosing employment. Students will also learn how to calculate their take home pay.
Title	Employment Choices	
Course Code	BMATHPF14	
COURSE: SECONDARY MATH III		TEACHER: Darci Rhoades Stone EMAIL: drhoades@alpinedistrict.org
Course	Secondary Math III, Unit 1	This unit covers data analysis, standard deviations, samples, surveys, and normal distributions.
Title	Drawing Conclusions from Data	
Course Code	BSCMTH301	
Course	Secondary Math III, Unit 2	This unit on polynomial functions covers adding, subtracting, multiplying, and dividing polynomial function, linear factors, zeros, solving polynomial functions, dividing polynomials, the fundamental theorem of algebra, models in the real world, and polynomial transformations.
Title	Polynomials and Polynomial Functions	
Course Code	BSCMTH302	
Course	Secondary Math III, Unit 3	This unit will cover rational expressions and their functions. It includes: simplifying, adding subtracting, multiplying, dividing, graphing, and solving rational
Title	Rational Expressions and Functions	

Course Code	BSCMTH303	expressions and equations. It also includes a look at functions and their inverses.
Course	Secondary Math III, Unit 4	This unit is a study of radical expressions and their functions. It will cover: Multiplying and Dividing Radical Expressions, Binomial Radical Expressions, Function Operations, and solving those functions. Graphing will also be covered as will inverse functions.
Title	Radical Expressions and Functions	
Course Code	BSCMTH304	
Course	Secondary Math III, Unit 5	This unit is a study of exponential and logarithmic functions. Students will explore exponential and logarithmic models while learning the various properties that define them.
Title	Exponential and Logarithmic Functions	
Course Code	BSCMTH305	
Course	Secondary Math III, Unit 6	This unit covers the basics of trigonometric functions. The topics of periodic data, angles and the unit circle, radian measure, the sine, cosine, and tangent functions, reciprocal trigonometric functions and basic trigonometric identities are covered.
Title	Trigonometric Functions	
Course Code	BSCMTH306	
Course	Secondary Math III, Unit 7	This unit covers the mathematical concepts of sequences and series, with specific sections that focus on mathematical patterns, arithmetic sequences and series, geometric sequences and series, and the binomial theorem.
Title	Sequences and Series	
Course Code	BSCMTH307	
Course	Secondary Math III, Unit 8	This unit is about applying geometric concepts. The concepts that will be covered are: Solving Density and Design Problems, Perimeters and Areas of Similar Figures, Geometric Probability, Space Figures and Cross Sections, Areas and Volumes of Similar Solids, and Loci.
Title	Applying Geometric Concepts	
Course Code	BSCMTH308	
COURSE: STATISTICS		TEACHER: Darci Rhoades Stone EMAIL: drhoades@alpinedistrict.org
Course	Statistics, Unit 1	This unit covers the basics of statistics, organizing data, and measuring variation.
Title	Introduction to Statistics	
Course Code	BINTSTAT1	
Course	Statistics, Unit 2	This unit covers the basics of correlation and linear regressions.
Title	Introduction to Correlation	
Course Code	BINTSTAT2	

AND PHYSICAL

PHYSICAL AND HEALTH EDUCATION

Classes that require a 1-week commitment cannot be done concurrently with another week from the same unit.

	COURSE: HEALTH	TEACHER: Emily Bahr EMAIL: edrechsler@alpinedistrict.org
		2. Miller currentier warpineutstrictiong
Course	Health, Unit 1	This unit discusses topics that deal with what is involved in obtaining a "healthy self." These topics
Title	Mental and Emotional Health	include self-esteem, personal values, decision-making skills, goal setting, stress management, suicide
Course Code	BHEALTH11	prevention, and mental illness.
Course	Health, Unit 2	In this unit, students will learn about exercise and nutrition. Several topics will help each student better
Title	Nutrition, Exercise, Body Image, and Eating Disorders	understand how to properly take care of themselves. These topics include the components and benefits of
Course Code	BHEALTH12	proper nutrition, the benefits of physical activity and weight management.
Course	Health, Unit 3	
Title	Disease, Injury Prevention, and Substance Abuse	In this unit, students will learn about substance abuse, injury prevention, and communicable and noncommunicable diseases.
Course Code	BHEALTH13	
Course	Health, Unit 4	In this unit, students will learn about healthy and unhealthy relationships, internet safety, reproductive
Title	Disease Prevention/HIV and STD's	anatomy and health, human reproduction, contraception, STDs, and STIs. This unit requires parental/guardian
Course Code	BHEALTH14	consent. There are alternative assignments that can be done if no consent is given.
COURSE	: PARTICIPATION SKILLS	TEACHER: Khalil Sikander EMAIL: ksikander@alpinedistrict.org
Course	Participation Skills, Unit 1	1-week commitment and 10 hours of logged exercise In this unit, students will discuss heart rate, strength, and
Title	Heart Rate, Strength and Endurance	endurance. Students will practice strength and endurance in a circuit training workout and learn how to build a custom program. Students will submit one video
Course Code	BPESKILL1	of themselves participating in physical activity and a total of 10 hours of physical activity must be completed during this unit.
Course	Participation Skills, Unit 2	1-week commitment and 10 hours of logged exercise In this unit, students will go over basic nutrition and
Title	Basic Nutrition and Weight Management	weight control information and will assess components of common foods. Students will submit one video of themselves participating in physical activity and 10
Course Code	BPESKILL2	themselves participating in physical activity and 10 hours of physical activity must be completed during this unit.

Course	Participation Skills, Unit 3	1-week commitment and 10 hours of logged exercise In this unit, students will discuss the benefits of exercise
Title	Benefits of Exercise and Flexibility	on their social and mental health. Students will also look at the basics of flexibility and try a yoga routine. Students will submit one video of themselves
Course Code	BPESKILL3	participating in physical activity and at least 10 hours of physical activity must be completed during this unit.
Course	Participation Skills, Unit 4	1-week commitment and 10 hours of logged exercise This unit covers the MyPlate website and discusses the
Title	Cardio-Respiratory Endurance	concepts we will find there. Students will go over cardio-respiratory endurance and its benefits to health. Finally, students will submit one video of themselves
Course Code	BPESKILL4	participating in physical activity and total at least 10 hours of physical activity during this unit.
COUR	RSE: FITNESS FOR LIFE	TEACHER: Alyssa Evanson EMAIL: aevanson@alpinedistrict.org
Course	Fitness for Life, Unit 1	1-week commitment
Title	Wellness and Safety	In this unit, students discuss the importance of fitness and wellness and the benefits of physical activity. Students identify how to be smart and safe during
Course Code	BFITNESS1	physical activity and the appropriate amount of exercise.
Course	Fitness for Life, Unit 2	1-week commitment
Title	Self-Management and Lifestyle	In this unit, students discuss self-management skills and how a positive attitude can help them reach their physical activity goals. Students will also learn about
Course Code	BFITNESS2	cardiovascular fitness and recreational activities.
Course	Fitness for Life, Unit 3	1-week commitment
Title	Strength, Endurance, and Flexibility	In this unit, students will get into skill-related physical fitness, strength, endurance and flexibility principles. Also, students will go over general fitness and body
Course Code	BFITNESS3	composition information.
Course	Fitness for Life, Unit 4	1-week commitment In this unit, students will go over nutrition and food
Title	Nutrition and Stress Management	choices. Students will also discuss stress management and how to keep a perspective based on overall
Course Code	BFITNESS4	wellness. The unit will help students develop a personal health and fitness program.
COURSI	E: LIFETIME ACTIVITIES	TEACHER: Khalil Sikander EMAIL: ksikander@alpinedistrict.org
Course	Lifetime Activities, Unit 1	1-week commitment and 10 hours of logged exercise This unit will start by introducing the idea of lifetime
Title	Introduction to Lifetime Activities	activity. Students will discuss the benefits, recommendations, and ways to increase physical

Course Code	BLIFEACT1	activity. Students will identify different types of exercises and start a log of the physical activity that they do. Students will find their target heart rate and BMI and end will learn the basics of a few common lifetime activities.
Course	Lifetime Activities, Unit 2	1-week commitment and 10 hours of logged exercise In this unit, students will learn more about calories and
Title	Calories and Diet	the kinds of calories that are best for their bodies. They will track the calories they eat and find ways you can
Course Code	BLIFEACT2	improve their diet. Students will also choose 2 activities that they will record themselves performing and turn in.
Course	Lifetime Activities, Unit 3	1-week commitment and 10 hours of logged exercise In this unit, students will discuss more in-depth nutrition
Title	Nutrition and Major Food Groups	and the major food groups and they will track the serving they eat in each food group. Students will also
Course Code	BLIFEACT3	discuss some types of exercise they can do at home. Students will learn about some common types of lifetime activities and turn in 2 videos of themselves performing a lifetime activity.
Course	Lifetime Activities, Unit 4	1-week commitment and 10 hours of logged exercise In this unit, students will learn how to build a meal plan.
Title	Building a Meal Plan	Students will identify motor skills and life expectancy. They will discuss 2 common lifetime activities. They
Course Code	BLIFEACT4	will then turn in their log of the physical activity that they did and make a plan for the physical activity they will do after you finish the course.

SCIENCE

SCIENCE CORE		
C	OURSE: BIOLOGY	TEACHER: Haylee Stewart EMAIL: hferguson@alpinedistrict.org
Course	Biology, Unit 1	This unit focuses on ecology. Students will learn about
Title	Ecology	food chains, energy flow, ecological relationships, abiotic and biotic factors, human impact on ecosystems,
Course Code	BBIIOL0001	levels of organization, and biomes.
Course	Biology, Unit 2	This course focuses on organ systems and homeostasis. Students will learn about levels of organization,
Title	Organs/Organ Systems	structure and function of organs, homeostasis, and how organ systems work together. The digestive, circulatory, nervous, endocrine, and immune systems will be
Course Code	BBIOLOGY02	highlighted. This course corresponds with Utah SEEd Strand Bio.2: Structure and Function of Life.
Course	Biology, Unit 3	This unit focuses on cells and their structures. Students
Title	Cells I	will learn about the characteristics of living things, the history of cell discoveries, cell chemistry, and cell
Course Code	BBIOLOGY3	organelles.
Course	Biology, Unit 4	This unit focuses on cell activities. Students will learn
Title	Cells II	about the cell cycle, mitosis, photosynthesis, cellular respiration, and cellular movement.
Course Code	BBIOLOGY4	
Course	Biology, Unit 5	This unit focuses on DNA. Students will learn about the
Title	Genetics I	history of DNA discoveries, DNA, RNA, replication, transcription, translation (protein synthesis), mutations,
Course Code	BBIOLOGY5	and cloning.
Course	Biology, Unit 6	This unit focuses on heredity and genetics. Students will learn about asexual and sexual reproduction, meiosis,
Title	Genetics II	the human genome, Gregor Mendel and his experiments, Punnett squares, dominant and recessive
Course Code	BBIOLOGY6	traits, incomplete dominance, codominance, and pedigree charts.
Course	Biology, Unit 7	This unit focuses on evolution. Students will learn about the history and mechanisms of evolution, geologic time,
Title	Evolution I	variation, natural selection, speciation, evidence for evolution, and misconceptions about evolution.

Course Code	BBIOLOGY7	
Course	Biology, Unit 8	This unit focuses on evolution and how all living
Title	Evolution II	organisms are related. Students will learn about the six kingdoms of life, classification, cladograms,
Course Code	BBIOLOGY8	phylogenetic trees, and dichotomous keys.
COUF	RSE: EARTH SYSTEMS	TEACHER: Blaine Greenhalgh EMAIL: blaine@alpinedistrict.org
Course	Earth Systems, Unit 1	In this unit, students will learn about the Earth's
Title	Beyond the Clouds	atmosphere. Students will study how winds are created and how to map global wind patterns. Students will also investigate the agency depletion and how human
Course Code	BERTSYS01	investigate the ozone depletion and how human activities may be altering the climate of Earth.
Course	Earth Systems, Unit 2	In this unit, students will learn about the Earth's weather and storms and their impact on humans. Students will
Title	The Power of the Storm	study cloud types and formation processes. Students will also learn the methods and instruments used to measure,
Course Code	BERTSYS02	observe, and forecast the weather. Students will learn how to interpret and explain Utah's unique weather.
Course	Earth Systems, Unit 3	In this unit, students will learn about the Earth's water
Title	The World of Water	system. Students will study the properties and behavior of water. Students will also learn why water is vital to the Earth and its living systems. Students will study
Course Code	BERTSYS03	water sources, consumption and treatment.
Course	Earth Systems, Unit 4	In this unit, students will learn about the Earth's oceans.
Title	Wild Blue Oceans	Students will study the landforms of the ocean floor and the ocean environment and life forms. Students will study ocean currents and learn how they affect human
Course Code	BERTSYS04	activities, climate, and other Earth systems.
Course	Earth Systems, Unit 5	In this unit, students will learn about the layers and boundaries of the Earth. Students will study the
Title	Earth's Tectonics	continental drift and plate tectonic theories. Students will locate the major crustal plates and compare plate
Course Code	BERTSYS05	boundaries and movement. Students will study the causes and effects of plate movement.
Course	Earth Systems, Unit 6	In this unit, students will learn how to interpret earthquake activity using seismic wave data. Students
Title	Earthquakes and Volcanoes	will identify local earthquake risks and research the importance of predictions and warnings. Students will

Course Code	BERTSYS06	also learn about the different types of volcanoes and volcanic eruptions and research the effects of volcanic eruptions on Earth.
Course	Earth Systems, Unit 7	In this unit, students will learn about Utah's Earth Systems. Students will study temperature inversions and
Title	Utah Earth Systems	air pollution and how they affect us here in Utah. Students will also learn about Utah's severe weather and
Course Code	BERTSYS07	climate. Students will study Utah's water cycle and ecosystems. In this unit, students will also research the geology of Utah and the earthquake potential here.
Course	Earth Systems, Unit 8	In this unit, students will learn about the Big Bang Theory and the evidence used to support it. Students
Title	Earth, Solar Systems, and Universe	will study the formation of the elements and the life cycle of the stars. Students will study the formation of
Course Code	BERTSYS08	the Solar System and the process that exists in the universe. Students will also study how the heating of the sun produces winds and storms.
(COURSE: PHYSICS	TEACHER: Darci Rhoades EMAIL: drhoades@alpinedistrict.org
Course	Physics, Unit 1	In this unit, students will explore the forces that shape
Title	Velocity	our universe. Students will learn how to measure and describe a moving object in terms of position and velocity. This includes motion maps, data tables, graphs,
Course Code	BPHYSICS1	and equations.
Course	Physics, Unit 2	
Title	COMING SOON!	COMING SOON!
Course Code	COMING SOON!	

ELECTIVE SCIENCE

	SCIENCE	ELECTIVE
CO	URSE: ASTRONOMY	TEACHER: Blaine Greenhalgh EMAIL: blaine@alpinedistrict.org
Course	Astronomy, Unit 1	This is an introduction to Astronomy. Students will
Title	Introduction to Astronomy	learn about the scale of the universe, light and how astronomers use it to understand our universe and telescopes. The topics covered in this course are the
Course Code	BASTRO001	building blocks for future astronomy courses.
Course	Astronomy, Unit 2	This is an introduction to the solar system. Students will learn about the Terrestrial and Jovian planets, dwarf
Title	Our Solar System	planets and the reclassification of Pluto, and the left- overs of the solar system. Students will also learn about
Course Code	BASTRO002	impacts from celestial objects and the damage they can cause.
Course	Astronomy, Unit 3	This is an introduction to our Sun and stars. Students
Title	Sun and Stars	will learn about the structure of the Sun, how stars are formed, how they live and then how they die. Students will also learn about supernovas and the neutron stars
Course Code	BASTRO003	and black holes they create.
Course	Astronomy, Unit 4	This is an overview of galaxies and the large-scale structures of the universe. Students will learn about our
Title	Galaxies and the Big Bang	galaxy, the Milky Way, and how our galaxy compares to others. Students will also get an introduction to dark
Course Code	BASTRO004	matter and dark energy and the cutting edge of astronomy today.
(COURSE: BOTANY	TEACHER: Haylee Stewart EMAIL: hferguson@alpinedistrict.org
Course	Botany, Unit 1	In this unit, students will learn about the phyla of plants
Title	The Plant Kingdom and Plant-like Organisms	in Kingdom Plantae, including bryophytes, seedless vascular plants, and seed plants. Students will also learn
Course Code	BBOTANY01	about plant-like protists and fungi.
Course	Botany, Unit 2	
Title	Plant Tissues and Organs	Students will learn about plant tissues and organs, including roots, stems, leaves, flowers, and fruits. Students will learn about their structures and functions.
Course Code	BBOTANY02	Students will learn about their structures and functions.
Course	Botany, Unit 3	In this unit, students will learn about the physical characteristics of plants like blade pattern and leaf

Title	Plants of Utah	arrangement. Students will then learn to identify 50 plants common to the state of Utah by their common
Course Code	BBOTANY03	name, scientific name, and family name.
Course	Botany, Unit 4	In this unit, students will learn about photosynthesis,
Title	Plant Physiology	cellular respiration, the cell cycle, plant hormones, plant responses, and plant adaptations. This unit should be completed after Botany Unit 1 and Unit 2. It may be
Course Code	BBOTANY04	taken concurrently with Botany unit 3.
CO	OURSES: ZOOLOGY	TEACHER: Haylee Stewart EMAIL: hferguson@alpinedistrict.org
Course	Zoology, Unit 1	In this unit, students will take a general survey of the
Title	Sponges, Cnidarians, and Flatworms	kingdoms of life, learn what an animal is, and then learn about sponges, cnidarians (jellyfish, anemones), and
Course Code	BZOOLOGY1	flatworms.
Course	Zoology, Unit 2	This unit briefly reviews animals from Zoology 1
Title	Round, Segmented Worms, and Mollusks	(sponges, cnidarians, and flatworms). Then students will learn about roundworms, segmented worms, and
Course Code	BZOOLOGY2	mollusks.
Course	Zoology, Unit 3	
Title	Arthropods and Echinoderms	This unit covers arthropods (spiders, crustaceans, insects, etc.) and echinoderms (sea stars, etc.)
Course Code	BZOOLOGY3	
Course	Zoology, Unit 4	In this unit, students will learn about chordates, which
Title	Chordates and Vertebrates	includes non-vertebrate chordates (like Amphioxus ar tunicates) and vertebrates (fish, amphibians, reptiles,
		birds, and mammals).

CORE STUDIES SOCIAL

SOCIAL STUDIES CORE		
СО	URSE: GEOGRAPHY	TEACHER: Katie Pickett EMAIL: kpickett@alpinedistrict.org
Course	Geography, Unit 1	In this unit students will explain what are graphy is
Title	What is Geography?	In this unit, students will explain what geography is through the 5 themes of geography and demonstrate mapping skills.
Course Code	BGEOGR001	
Course	Geography, Unit 2	
Title	Earth's Physical Geography	In this unit, students will describe the physical features of the Earth and how they develop.
Course Code	BGEOGR002	
Course	Geography, Unit 3	
Title	Human Geography	In this unit, students will describe the human features of geography and how they develop.
Course Code	BGEOGR003	
Course	Geography, Unit 4	
Title	Understanding the World	In this unit, students will apply their geography knowledge and skills to understand real-world situations.
Course Code	BGEOGR004	Situations.
COURSE: GO	OVERNMENT & CITIZENSHIP	TEACHER: Janice Comer-Miller and Nicole Kelsch EMAIL: jcomer_miller@alpinedistrict.org / nkelsch@alpinedistrict.org
Course	Government and Citizenship Unit 1	
Title	Government Foundations	This unit explores the founding principles of the U.S. Government and Constitution, including its structure, function, and mechanisms.
Course Code	BGOVCIT11	ranonon, and meenamonis.
Course	Government and Citizenship Unit 2	
Title	Branches of Government	This unit covers the three branches of government, including their roles and responsibilities.
Course Code	BGOVCIT12	

Course	Government and Citizenship Unit 3
